Digital Enterprise Lab - DEL

Digital Enterprise Lab (DEL) was founded in 2014 at Ca' Foscari University of Venice as a research, experimentation and educational center with focus on digital and technology-driven innovation.

Key Objectives

• DEL aims to assist Italian companies in building in-house digital competencies and support them in carrying out digital transformation of their business

• DEL seeks to support and instill innovative thinking in students, companies, public institutions and non-profit organizations as they explore and use digital technologies

Key Actvities

• Organizing digital-themed events, round tables and conferences to increase digital awareness among business and IT professionals and promote knowledge exchange
• Offering executive educational and training programs to support managers in developing new digital skills and learning from top educators and industry experts
• Conducting research projects aimed at enhancing our understanding of how digital technologies affect modern enterprises from strategic, organizational and socio-economic perspectives

Main Results

• 100+ digital education days

• 20+ digital awareness events

• 3 digital research projects

• 2 startup programs

• 50+ faculty members

• 100+ participants
