ERUDITE
Interreg Europe

www.interreg.eu/erudite

IDéO / Territoires Numériques BFC

A regional shared digital platform providing open data / geo resources and online services such as e-tendering capacities, webservices for citizens... The platform targets mainly public sector entities but also businesses and citizens.

Actions and Objectives

Drafting the next generation data centric and platform: simple visualisation tools, extensive use of API with public and private partners (structured data, documents...).

Focus on the accessibility of the research tools (simple filters, easy to find what you are looking for) and the quality of the results (minimizing noises).

Focus on giving local authorities methods, tools and expertise in order to design and promote their projects regarding data.

Multi-partners workshop for designing the Internet portal and its satelittes (training, workstrand

Expected Results

Being part of the next step of the national experiment on public data (OpendataLocal v2).

A regional observatory of the public tenders.

A consolidated portal for www.ideobfc.fr and www.databfc.fr enhanced with a Knowledge access to partners studies (observatories).

Roll-out expected in November 2019

Role of ERUDITE

Access to an array of KPIs and a process/tool for measuring the impact of the overall platform and its associated services

Access to best practice examples from partner territories (Venice DI.ME) for reference and inspiration
