

Interreg Europe 2021-2027 draft cooperation programme

Public consultation webinar

24 March 2021, 10:00-11:30

On 25 February 2021, the Interreg Europe programming committee approved the draft version of the future Interreg Europe cooperation [programme](#). This was the result of more than 16 months of discussions and consultations among the 29 Partner States involved in the programme (27 EU Member States plus Norway and Switzerland).

Now that a complete draft is available, the programme authorities have launched a public consultation so that all interested stakeholders can express their opinions and contribute to the final design of the future programme. The present webinar is part of this consultation process. It aims at presenting and exchanging with the participants on the main features of the new programme.
