Summary Partner meeting

Brigitte Feenstra

Project officer Islands of Innovation

b.t.feenstra@fryslan.frl

5 and 6 April 2017 | Partner meeting Samsø, Denmark

Wednesday, 5 April 2017

PITCHES

Partnership

Pitch Province of Fryslân

We Frisians have experience with beating the water: terps

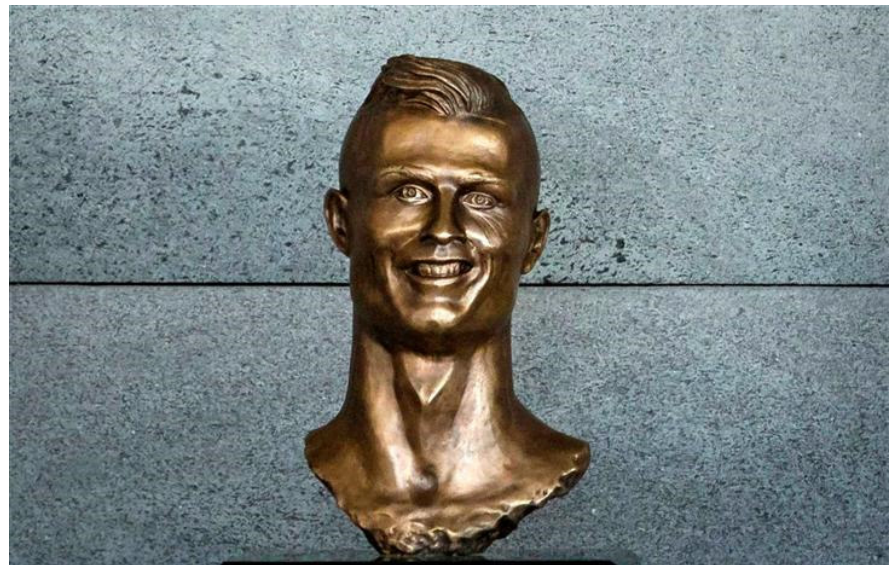

Pitch Samsø Energy Academy

We want to be fossil fuel free island by 2013. This is a pilot project for the rest of Denmark. More goals in the masterplan are: to save energy and strengthen and establish partnerships.

Pitch ARDITI

Our office is responsible for the innovation and entrepreneurship: stakeholders m-iti, start-up Madeira, ACIF, madeira , DRC. We have to help our politicians to think different. Not in bridges and tunnels but in innovation. And we have Christano Ronaldo 😊

Pitch Kuressaare City Government

Islands of
Innovation
Interreg Europe

Smart people will learn from other peoples mistakes. So please also **SHARE** all your good and less good practises.

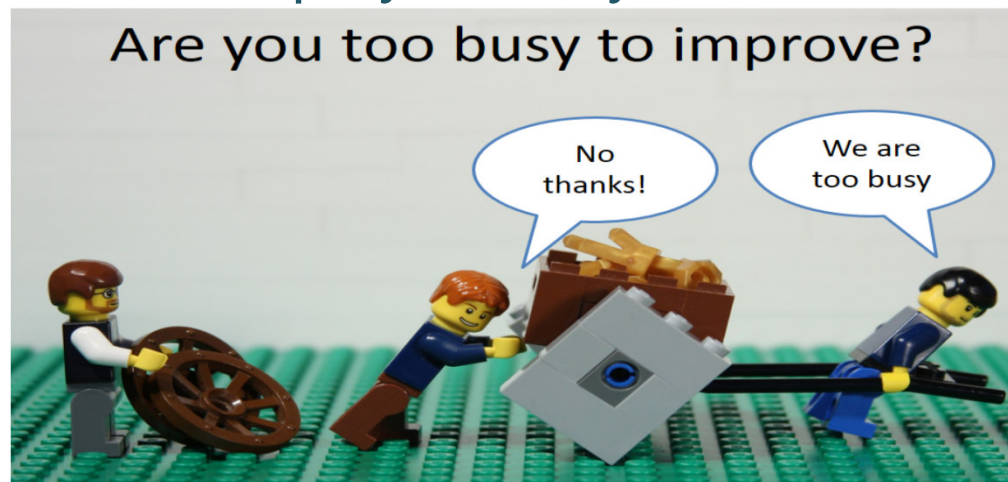

Note: Kuresaare county will change his name in the near future.

Pitch Regional Government of the Azores

Has 7 volcanic and isolated islands. We want to use our products for innovation and add value. We can produce (right temperature and enough land), but we can't export. Innovation is a state of mind. We don't want to grow on tourism, because of the sustainable impact.

Our unemployment is above the national average. We want to decrease the unemployment by a business incubator.

Pitch CANBT

by Albert Ruiter: ☐ We need to pay attention to mother earth

Pitch North Aegean Region

The region has 10 islands of which Lesbos is the largest.
Priorities: Agri-food, Tourism/culture and E-economy.

Deliverables: Led lights, lighting on solarpanels and replacement of heat pumps.

Lighting of road junction with solar panels

Wednesday, 5 April 2017

VIKING CIRCLE

Viking Circle

Leadership

- Capacity to mobilise action (mobilise =action)
- How do I mobilise action (effective)

More information: <https://energiakademiet.dk>

Skills

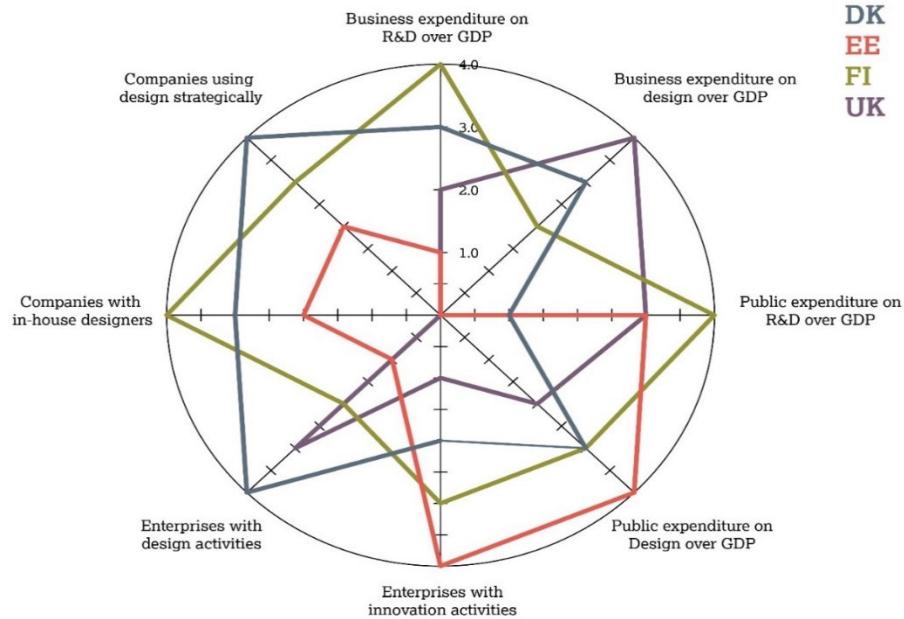

1. Emotions and language
2. System thinking:
Conversation for action and possibility
3. Systemic sustainability
(envision collective system to work in harmony)
4. Anthological designing
(redesign the human into sustainable thinking persons)
5. Adaptive challenges (to design new solutions for products and problems which isn't there yet)
6. Vision and wisdom of the future
7. Personal evolution

Viking Circle

Principles

- Leadership is shared
- Listen to understand
- Whoever is here are the right people
- Let go of judgement. Listen with an open mind.
- Hold the centre by having trust

Thursday, 6 April 2017

TIPPING WHEEL

TIPPING WHEEL 1.0

made by Belmane, Bezet and Ruiter (advisory group)

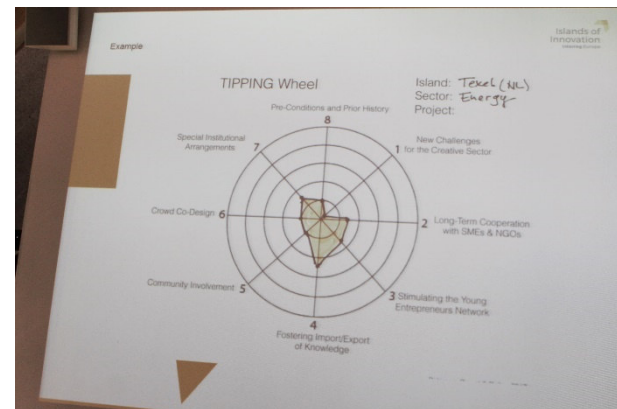

The tipping wheel is one of the over 500 different instruments. Use it in 3 ways: past, present and future for the Economy, Ecology and Social Aspects.

Partners have 20 minutes to try to work with the Tipping wheel and presented their first experience.

The advisory group will improve the wheel (like government back-up). And on Madeira they will present Tipping Wheel 2.0.

Action

Use this wheel or the improved version for your stakeholders, so we can compare.

Partners work for the first time with the Tipping Wheel 1.0

IMPRESSION STUDY VISIT

Fossil free transport to the Academy

Always
available

The Mayor of Samsø, Marcel Meijer, tells about the sustainable projects the municipality is working on.

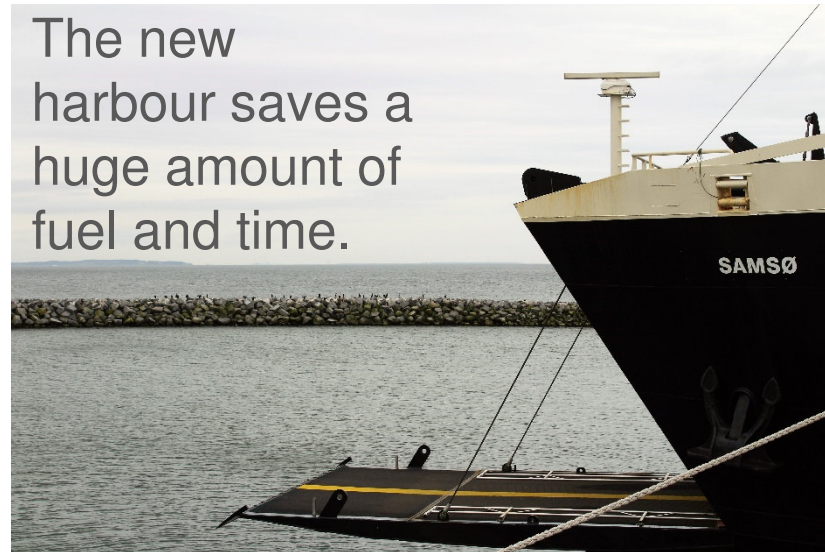

Electric mower
of the Samsø
golf course

Local entrepreneurs

The new harbour saves a huge amount of fuel and time.
