Andalucía participates in a European project to boost energy efficiency in heritage buildings

The Ministry of Development and Housing participates as a partner in a project promoted by the European Union, called 'Violet'. Seeking to promote the application of energy efficiency measures in rehabilitation processes that are carried out in buildings of architectural and patrimonial interest, which are currently exempt from implementing these energy sustainability measures. Together with Andalucía, five other public entities of this scope also form part of this European initiative ...

Andalucía participates in a European project for the rehabilitation of buildings

Andalucía has presented the measures contemplated in the Housing and Rehabilitation Plan 2016-2020 within the framework of 'Build Upon', a European project financed within horizon 2020 with 2.35 million euros. This project has gathered this week in Seville to its different participants in a meeting in which the Ministry of Development and Housing has collaborated with the objective of improving the rehabilitation of buildings in Europe.
