### **RESOLVE Second PMG meeting and Peer Review in Växjö**

On 4-5-6 October 2016, all RESOLVE project partners attended the second Project Management Group meeting in Växjö, where they discussed the upcoming activities of SEM2 and the reporting procedures of SEM1.

### **Our 2016 in review**

2016 has been an important year for Resolve project. From the Kick Off Meeting in Roermond, on the 12th and 13th of April, a lot of works has been realised: Peer Review, Study Visit and more than 50 good practices shared with all project partners and stakeholders. What expects us for the coming year?

### **Peer review and Study visit in Manchester**

Transport for Greater Manchester (TfGM) invited delegates from across the continent to the three-day conference to draw-up action plans to support high street shops while reducing carbon emissions through improving public transport and encouraging more sustainable ways of delivering goods.

## Resolve News & Events

### Almada hosting the 4th Peer Review

The Peer review in Almada hosted a team of 9 Experts coming from Portugal, Sweden, the Netherlands, Czech Republic, Poland and Slovenia. During the first day of the Peer Review, the City Council introduced Almada's Local Strategy for Sustainable Mobility: its success stories, current drawbacks and challenges, but also the objectives and needs of RESOLVE Peer Review.

## INTERREGIONAL LEARNING

### RESOLVE Peer Review cycle almost completed

One of the first steps in the Interregional Learning process is the assessment of strengths and weaknesses of partners' mobility plans. We call it the Peer Reviews! Each partner receives a visit of a panel of (national and international) experts. These experts assess partners' mobility plan giving special attention to retail related traffic. The Peer Review should help each partner to identify the Good Practices they will import later during the project.

After a slow start in 2016 – with the Peer Reviews in Roermond (NL) and Kronoberg County (SE) – in the first months of 2017 this Interregional Learning activity is getting into full swing: Manchester (UK) in January, Almada (PT) in February, Moravia-Silesian Region (CZ) in March, Warsaw, Maribor and Reggio Emilia in April.

So far, the experience with the Peer Review is very positive, both for the partners and the experts. The partners profit from the fact that a group of experts look at their plans with a different perspective. Sometimes it provides very useful insights that can be used to improve their mobility plans. And the experts enjoy the Peer Review as well! They also learn a lot by meeting professionals from other countries and by being in close contact with policy makers and local stakeholders in the partner regions.
