

Stakeholders Group Meeting n° 2

Date	06 December 2016, 12.45-15.00
Meeting place	Tallinn City Centre Government, Nunne 18, 10133 Tallinn
Aim of this meeting	<p>To provide stakeholders overview of activities performed in INTHERWASTE project.</p> <p>To discuss problems related to waste management in Tallinn Old Town and to find possible solutions.</p> <p>To get active feedback and expertise from stakeholders in drafting the activities of the project.</p>

**Minute of the meeting:
Topics explored - Decisions taken**

12.45 -13.00 Registration and welcome coffee

13.00-13.20 Implementing organized waste collection service in Old Town and main problematic points, Martin Gasman, Head of Tallinn Waste Center

Martin Gasman, Head of Tallinn Waste Center, made overview of organized waste collection service in Old Town and main occurring problems (heritage are restrictions, difficulties to access and install containers, bad odour, rodents). Martin made suggestions on behalf of Tallinn Waste Center how to improve waste management in heritage area.

13.20-13.40 Overview of INTHERWASTE project partners current waste management situation, Triin Ida, Tallinn Environment Department

Triin Ida introduced waste management situation of INTHERWASTE project partners (Porto, Krakow, Cordoba, Tallinn) and made summary of current waste systems strengths and weaknesses.

13.40-14.00 Tallinn Old Town free from waste transport? Examples of pneumatic waste collection system, Kristjan Mark, Tallinn Environment Department

Kristjan Mark spoke about pneumatic waste collection system as one possible solution to change Tallinn Old Town waste collection more esthetic, economic and reduce the environmental impact of waste transport. As illustrative material videos of pneumatic waste collection technology were shown.

14.00-14.20 Waste Management Plan for the City of Tallinn 2017-2021, Kristjan Mark, Tallinn Environment Department

Kristjan Mark described Waste Management plan for the City of Tallinn which is prepared for the next period 2017-2021. He pointed out some necessary improvements what has to be made to influence waste management in Old Town area e.g. separate action plan for Old Town area in terms of planning policies and interventions as there is currently lack of regulations in that area.

Debate, questions & answers

After each presentation there was lively discussion between members of stakeholders group.

Representatives of Apartment Associations asked questions and made different propositions how to solve problems concerning installation of containers in Old Town e.g. establish shared waste containers for separate collection. Participants showed up big interest towards Waste Management Plan prepared for the next 2017-2021 period and pneumatic waste collection system.

There is forming one stable group of stakeholders (approximately 14 participants), who are attending meetings held during INTHERWASTE project.
