My Enterprise Finland - oma.yrityssuomi.fi

My Enterprise Finland is an online service for existing enterprises and private persons establishing a new business and is intended for managing all the enterprise's affairs online. The most appropriate tools for the various needs are compiled within the service and gathered conveniently in one place. The service is provided and developed further by Ministry of Economic Affairs and Employment.

Issues Faced

During the last decade many of the public agencies have reduced the amount of their customer service offices. Thus contacting the public sector advisors face-to-face, especially in rural areas, is very difficult.

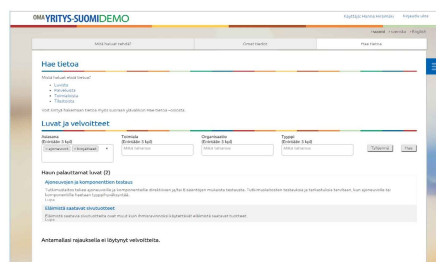

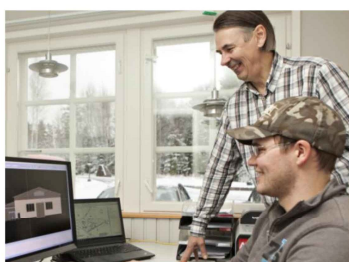

My Enterprise Finland was developed to allow a paperless, 24/7 easy access to information and services around establishing a new business.

Key Objectives

- Desktop-specific online service for budding enterprises.
- Instructions, notifications, licences can be all created, managed and sent for approval through the system.
- The workspace allows clients to be served electronically and provides real-time advisory services in the spirit of networked cooperation.

Main Results

- A comprehensive web site with all the information needed to establish a company in one, easy-to-access place.
- With profiling, the My Enterprise Finland service will be offering services and tools based on the user's field of business, location and company development phase (among others issues).
- Saves costs and time - no need to visit the employment offices.
