## POLICY INSTRUMENTS FOR ENERGY SELF-CONSUMPTION IN BUILDINGS

---

You are reading 1st **ENERSELVES** Newsletter

September 2017

**ENERSELVES** develops and improves local and regional policies to support the integration of the most profitable renewable energies in the self-

consumption of buildings through Structural Funds and other financial instruments.

**ENERSELVES** was launched in the beginning of 2017 and will be running until the end of 2020.

The **ENERSELVES** partners are seven institutions from six European countries: Spain, Sweden, Poland, Malta, Italy and Romania.

Next you will find out what has been carried out during the first Semester of ENERSELVES. This first newsletter is provided by the project Lead Partner AGENEX, Extremadura Energy Agency.

---

## Aims

- Promote new policies or improve existing policies to support the integration of renewable energy into buildings for self-consumption
- Design policies to promote only those renewable energies for self-consumption technologies with greater benefits in each region.
