SOCIAL GREEN

General description.

Social Green - Regional Policies towards Greening the Social Housing Sector is oriented to jointly tackling the topic of housing deprivation and energy efficiency in the scope of social housing sector towards a lower carbon economy. The overall objective of the project is to improve regional policy instruments targeting the link between social housing sector and fuel poverty with green building interventions considering policy, institutional, financial and technical levels.

Through interregional cooperation, regions will identify, share and transfer innovative methodologies, processes and good practices in developing and implementing greener social housing sector policies, targeting new constructions or retrofitting existing buildings. For do so, study visits, good practices workshop, local stakeholders meetings, among other dissemination events will be organised.

Within this interregional learning process the regions involved in the project will develop Self-Assessment Reports, good practices guides and regional action plans.

Partnership.

The partnership includes 8 partners from 6 countries (Portugal, Spain, Croacia, Estonia, Sweden, Romania), with capacity to influence the policy instruments related to greening the social housing sector.
