*Curriculum vitae*

Graduated with honores in geology at University of Naples "Federico II" in 1988, she have performed in addition to professional activities, in the areas of the South Center of Italy, studies and technical-operational with the *Commissioner for Area Flegrea bradyseism*. Subsequently, she worked with the Campania Region (Cabinet of president, Water Department, Urban Planning and Territorial Department). Within this activity, she defined the program for the creation of national river basin authorities (referred to in Law 183/89): in particular for the river basin authority of Liri-Garigliano and Volturno she first performed the function of coordinator and subsequently, technical manager. Since 2007, for the same National Authority, she has served as General Secretary and since 2009 has served as coordinator of the Southern Apennines Basin District. Since 2014, appointment by the Presidency of the Ministers Italian Council, she has assumed the role of Extraordinary Commissioner:

- *emergency interventions for reclamation, environmentalization and retraining of Taranto*
- *implementation of the safe-keeping and management of hazardous and radioactive waste sites located in the Cemerad former in Statte*
- *design, installation and execution of works for the functional adaptation for the Napoli Est purification plant;*
- *design, installation and execution of works of purification system for the municipalities of Mondragone and Falciano del Massico.*

She have produced many scientific and technical publications as well as the promotion of numerous events and promotions of *cultural, scientific and solidarity activities*. The many years of work in this area and the roles she assumed, the numerous contacts and relationships at national and international level, have consolidated the role played by Mrs. Corbelli in the south of Italy, in institutional/technical/managerial for the government water and soil resources
