

Stakeholder group meeting (unfortunately we do not have a picture/photo available)

In July we discussed the SUPER project with the domain managers of the Economic Board Utrecht. The economic board is the triple helix vehicle of the Utrecht region that supports business development and built business networks and coalitions. The managers represent the domains Green, Healthy, Smart and Internationalisation. We discussed the results and recommendations of the eco-innovation SME analysis (interviews), incl. the findings for internationalization. Also, we together with the domain managers prepared the input from the Province of Utrecht at the partner meeting in Lithuania. The domain managers, especially on the themes Green and Internationalisation, will be closely involved during the second phase of the project, in which they can implement the project's findings in their activities and plans.
