**CircE**  
Interreg Europe

European regions  
toward Circular  
Economy

## Context

**At the end of 2015 the European Commission has adopted an ambitious new Circular Economy Package to help European businesses and consumers to make the transition to a stronger and more circular economy where resources are used in a more sustainable way.**

## Ambition

CircE aims at **strengthening the diffusion of Circular Economy (CE)** thanks to the readdressing of some policy instruments towards resource efficiency.

To make the transition to the circular economy a reality, CircE involves all Stakeholders in each region in an open debate to share lived experience and find innovative solutions.

## Who is involved?

8 partners, both at **regional and local scale** and representatives of different European social and economic scenarios:

- Lombardy Region, I
- Government of Catalonia, E
- Marshal's Office of Lower Silesia, PL
- Province of Gelderland, NL
- London Waste and Recycling Board (LWARB), UK
- Creation Development Eco-Entreprises (CD2E), F
- Sofia Municipality, BG
- Association of Municipalities and Towns of Slovenia (SOS), SI

## How is it possible?

8 partners from different scales and european countries to tackling barriers for the development of the circular economy, through the exchange and mutual learning.

In particular, they will select some priority economic sectors in terms of circular potential and pave the way for actions to boost recycling, prevent the loss of valuable materials, promote new sustainable business models, support lighthouse initiatives and improve information and communication to businesses and citizens.

In the involved regions nearly **20 million people could benefit from the results of this project**, help us to spread it out!
