

## PRESS RELEASE

January 23, 2018

### A NEW ONLINE TOOL ALLOWS TO IDENTIFY THE BEST FORMS OF FINANCING IN REHABILITATION

An easy-to-use online tool allows you to quickly and intuitively locate the best form of financing for energy renovation of buildings using financial instruments: loans, guarantees, capital, etc.

It is a georeferenced map that shows a selection of financial instruments for energy efficiency and renewable energy throughout the world.

#### Useful and intuitive map

**The map currently has around 100 best practice but the goal is to reach 150.** Each one is accompanied by detailed economic data of the financial instrument that can be filtered, enumerated, printed and downloaded.

The project partners have been in charge of identifying best practices best suited to local and regional circumstances, where financial performance and the

impact on the reduction of carbon emissions have been key to their selection.

## **FINERPOL**

### **Financial instruments for energy renewal policies**

The [Finermap tool](#) has been developed within the European project FINERPOL whose main objective is to promote new policies, or improve existing policies, to create financial instruments that aim to finance energy efficiency projects and renewable energy in buildings, with funds of the Juncker Plan, financial institutions and the European Investment Bank to reactivate the construction sector, facilitating credit to housing developers and their owners.

The European [FINERPOL project](#), coordinated by the Extremadura Energy Agency, is co-financed by the European Union, through the European Regional Development Fund (ERDF) through the Territorial Cooperation Program INTERREG EUROPE has an allocation of more than 1 million of euros. It started in April 2016 and its duration will be until 2020.

FINERPOL is formed by a consortium of eight partners with European-wide performance and representing different agents present in the sector: AGENEX, Junta de Extremadura, Plymouth City Council, Management Authority of the Western Macedonia Regional Operational Program, Prague City, Technical University of Prague, CEiiA and the Autonomous Province of Trento.
