

## **Andalusia exhibits advances in energy efficiency in historic buildings in Cyprus as part of an EU project**

The Ministry of Development and Housing, through its Agency for Housing and Rehabilitation of Andalusia (AVRA), has participated in the second international meeting of the European project 'Violet' held in Nicosia (Cyprus), where he has made known his experience in works for energy efficiency in historic buildings of architectural interest.

SEVILLA, 15 (EUROPA PRESS)

The Ministry of Development and Housing, through its Agency for Housing and Rehabilitation of Andalusia (AVRA), has participated in the second international meeting of the European project 'Violet' held in Nicosia (Cyprus), where he has made known his experience in works for energy efficiency in historic buildings of architectural interest.

The meeting was attended by representatives of different entities and institutions of the partner countries of the project --Romania, France, Cyprus, Germany, Holland and Spain--, as well as various authorities of the host country representing the Ministries of Energy, Interior, Planning and Housing or Transport, Communication and Development and the City of Nicosia, the University of Architecture of Cyprus and other agencies of the country, as reported by the Board on Sunday in a note.
