Life M3P - Material Match Making Platform (LIFE15-ENV_IT_000697)

10 April 2018

- **Key activities**
 - To support Textile and Clothing companies towards research and innovation to face international competition
 - To develop new services
 - New tests
 - New certifications
 - To acquire new knowledge
- **Key figures**
 - Turnover: 6 million €
 - Employees: 90
- **Areas of work**
 - Laboratory Tests and Certification
 - R&D activities
 - Training activities

CENTROCOT

Circular Textiles

Life M3P - Objectives and scope

CENTROCOT
Innovation experience

To develop a digital on-line platform for cataloguing, characterization, use and exploitation of industrial waste produced in a local area, to promote industrial symbiosis:

- **reduction of used raw materials (replaced by waste material),**
- **reduction of waste (shifted to by-products),**
- **reduction of disposal of waste (alternative treatments).**

Waste characterization allows to:

- **in-depth studies about significant waste streams,**
- **find alternative use of materials,**
- **develop new creative product concepts.**

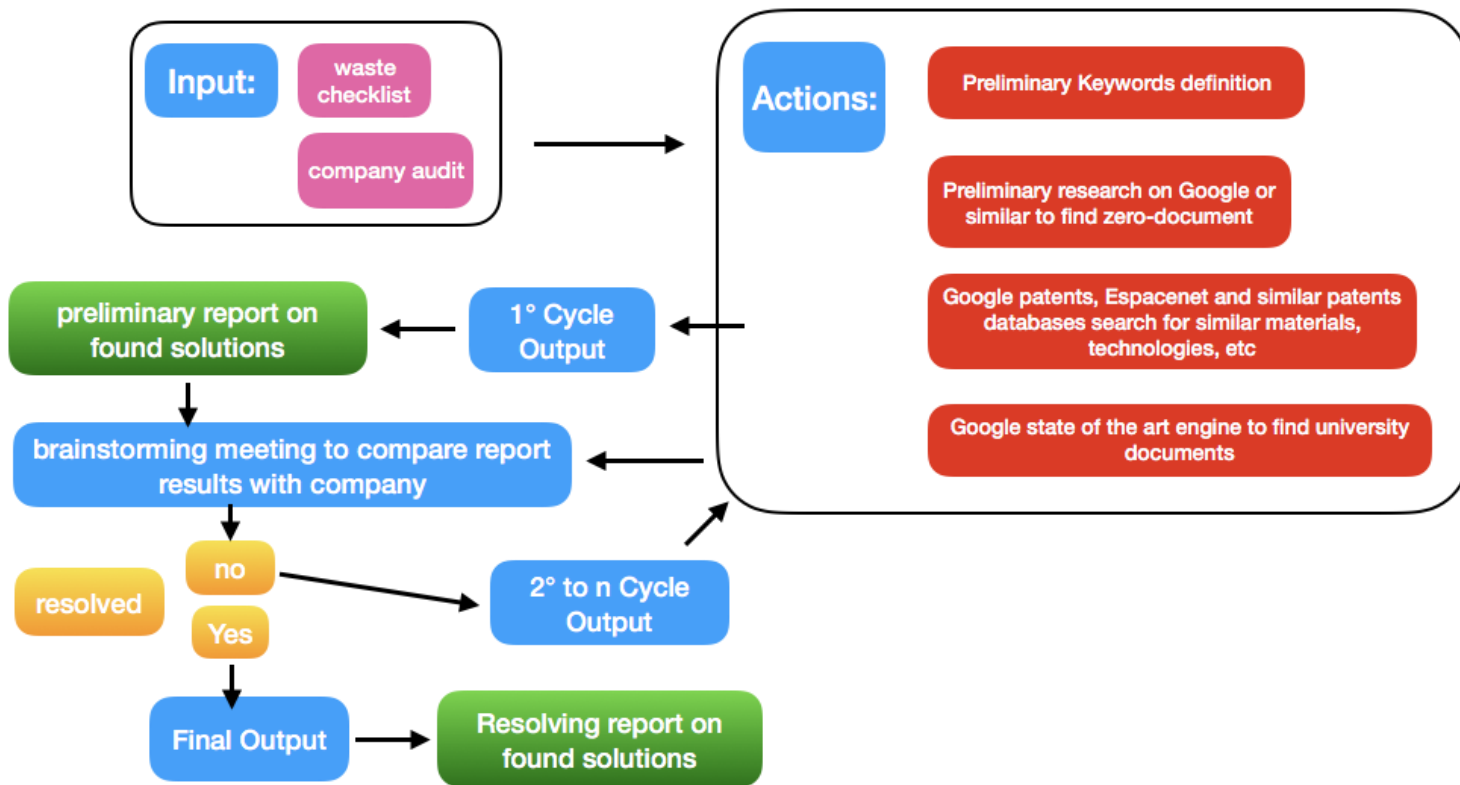

M3P Platform, based on Open 2.0

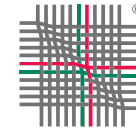

CENTROCOT
Innovation experience

Logical approach to create a smart matchmaking application
simulating human approach to problem solving of waste recycling

Based on Open 2.0 by Regione Lombardia, open environment to develop collaborative application
