## **ECCP Weekly Digest**

[The European Cluster Collaboration Platform \(ECCP\) – 2 years after:](#)

We are proud to share with you our achievements over the last 2 years, but even more to acknowledge the contribution of the whole cluster community for making ECCP the vibrant cluster platform that it has become today. We provide the framework and the services, but it is thanks to all the pro-active users and cluster stakeholders who visit the platform, who provide us content, who share with us their needs and also ideas for a better ECCP, who speak about us and promote us, who take part in our activities and give us the feedback on them – for all this we say to all of you a big THANK YOU! And we look forward to the upcoming years where we shall grow together and become more inclusive!

This week we are happy to introduce to you the [Cluster Excellence Denmark](#) network – the initiative supporting Danish clusters to become even better! Get to know more about the Danish cluster landscape, about the services provided to support clusters through a large variety of activities and about the team.

Your ECCP team
