

Newsletter #03 | June 2018

EV Energy on full speed!

Half a year has passed since you have received our last update. In the meantime, a lot has happened in our project we won't miss to share with you in this 3rd edition of our newsletter.

The semester in a nutshell: Stockholm was the location of this semester's project meeting and dissemination conference. There we met the most important regional energy and mobility stakeholders and experts to exchange our experiences with them, but also to see on the spot how electric mobility evolves in the Swedish capital. Undoubtedly, a very worthwhile visit for everyone interested in how to create a more sustainable urban environment.

Meanwhile, our networks of regional stakeholders expanded and with them our good practice database is growing. The challenge in the coming semester is to turn all the inspiration and experience gained locally, and from across Europe, into practice. We are setting the course towards implementation, let's join forces to reach sustainable change!

Newsletter Special: Stakeholder opinions on electric car charging in Stockholm

Stockholm's stakeholders share one vision on how to foster the transition from fossil to electric driven cars. According to them, home and overnight charging is key to enabling this transition. Listen to what [Eva Sunnerstedt](#) (City of Stockholm) and [Allan Larsson](#) (ElectriCity) state on the issue!

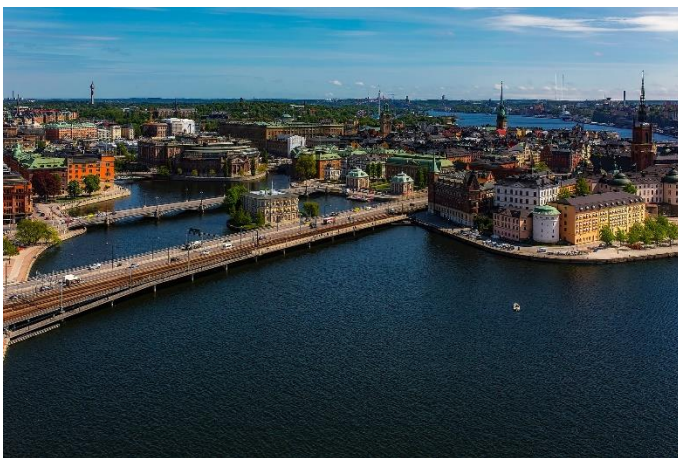

You can also find these videos and many more on our [YouTube channel](#). Don't miss to have a look!

Project News:

Stockholm sets the bar high!

Stockholm is without doubt one of the frontrunners in sustainable urban development including traffic electrification. We have visited the city together with stakeholders from all partner regions to discuss the latest challenges and achievements concerning electric charging infrastructure with them. [Read](#) the conclusions drawn from the event.

One of the world's most sustainable districts...

During our Stockholm stay we had the chance to visit the sustainable city district Hammarby Sjöstad and the aligned citizen initiative ElectriCITY dedicated to reduce the district's climate footprint. [Read](#) this review on our study visit including some interesting facts on Stockholm's charging infrastructure policies.

EV Energy on Dutch television!

EV Energy was commissioned by the Green Project section of TV programme RTL7 to demonstrate the goals and ambitions of our project. Emphasis was put on one of our good practices, Power Parking, to explain how your car can act as a small power plant. [Watch](#) the video.

Interreg Europe #experiencefair

Exchanging experience and getting inspired by other projects is what this event in Sofia (Bulgaria) was all about. [Read](#) what we have learned.

You also want to learn from other European region's experiences? Create your profile on the [Policy Learning Platform](#), search for good practices and get in touch with peers.

EV Energy @ EUSEW 2018

“Lead the clean energy transition” was this year’s theme of the European Sustainable Energy Week. How to do it in the urban context of electric vehicles and renewable energy was explained in our Policy Conference Session. [Watch](#) the full video or [read](#) a short review.

EUSEW Energy Day in Brussels

Four projects gathered to organise an Energy Day on “Europe’s Urban Energy-Mobility Transition” under the framework of the European Sustainable Energy Week. [Read](#) the event review and lessons learned from the different cases and speakers. You can also find the presentation slides from the event in our [website library](#).

What's going on in the partner regions?

Barcelona: Stakeholders discuss obstacles and opportunities to open up the way for a pilot implementation of the good practice “Smart Charging” from Amsterdam. One question addressed was how to allow electric vehicles to play a role in the energy system as “mobile energy storage facilities”... [Read more](#)

Rome/Lazio: Electric car-sharing in Rome and Lazio region is growing and implies the need for new and different forms of energy supply. How to meet this needs was, among other subjects, the question treated during several stakeholder meetings held over the last semester by our partner ANCI Lazio... [Read more](#)

Stockholm: One event, around 50 experts from the energy and mobility sector, 7 conclusions on how to boost electric mobility... [Read more](#)

You can also find the presentation slides from the event in our [website library](#).

Kaunas: Kaunas University of Technology is taking its vision on Lithuania’s electric mobility to the political level: With the Ministry of Transport and Communications of the Republic of Lithuania they discussed how experiences gathered from different partner countries could support the country’s sustainable mobility development... [Read more](#)

Upcoming Events

Barcelona is calling! Pull your agenda and mark the day in GREEN: 3rd October 2018 – “Electric Vehicles for Urban Energy Transition” event in Barcelona. Agenda available soon on our website.

Project Partners

Green IT Amsterdam (NL) | Barcelona Chamber of Commerce (ES) | EUR S.p.A (IT) | Province of Flevoland (NL) | Kaunas University of Technology (LT) | Regional Association of Lazio Municipalities (IT) | Stockholm County Council (SE)
