

## **Summary of the Report on COP Meeting – Semester 3**

### **PP4 The Public Enterprise for Social Housing and Refurbishment in Andalusia, Regional Ministry of Public Works and Housing**

The third Community of Practice (CoP) meeting of the Public Enterprise for Social Housing and Refurbishment in Andalusia took place in Seville, on the 13<sup>th</sup> June 2018. The main objective was to analyse the Best Practices made by regional or local government and select them to be presented in the 4th Interregional Project Partner meeting in Seville in October.

The CoP meeting began with a presentation on the Good Practices of the project partners regions; Schwäbisch Gmünd, Cyprus, Bordeaux and Romania. Seville City Council and Regional Ministry of Employment, Enterprise and Commerce presented what they are doing to improve the energy efficiency parameters during the rehabilitation works.

The groups prepared to present in the International week event in the beginning of July, where 2-3 of the best Good Practices per partner, shall be selected.

The 3<sup>rd</sup> CoP ended with a collective brainstorm on the structure of this international event. Face to face meetings, the presentation of the Good Practices, expertise speeches and a presentation of the most important buildings included in the program were mentioned here.

Over all, Sevillian CoP is really interested in an exchange of knowledge and to learn about Good Practices made by other stakeholders. It is important to them to know more details about the GP and the international event present an opportunity to do that.
