CONDEREFF – Workshop N°1

Management and recovery of construction waste

How to integrate the regulatory objectives in the contracts?

Date: 16th December 2018

Place: Departmental Federation of Building and Public Works of the Rhône – 23 avenue Condorcet – 69100 Villeurbanne

Author: Mathieu BAZAUD

Participants at the meeting:

Beyssac Hervé (Loire Department)
Bochard Cindy (FRTP AURA, Public Works National Federation)
Briel Lisa (City of Feyzin)
Charnet Caroline (Roannais Agglomération)
Charrié-Thollot Jean-Jacques (Unicem)
Chiri Frédéric (Grand Annecy Agglomération)
Delobel Elodie (Ain Department)
Drancourt Lucile (AURA-EE)
Eckhard France (Saint Etienne Métropole)
Faure-Rochet Odile (Auvergne-Rhône-Alpes Region)
Gaillard Claire (Saint-Etienne Métropole)
Gouilloud Pascal (Saint-Etienne Métropole)
Lapalus Daniel (City of Lyon)
Leseigneur Catherine (Grandlyon Habitat)
Mathevoit Maryelle Buiron (Association of Architects)
Pichon Victor (Arra HLM)
Rioux Marine (FFB Auvergne Rhône-Alpes, French Building Federation)
Severi Patrick (City of Lyon)
Venot Gabriel (InnoVales)
Yacoubou Mariama (City of Lyon)

Speakers:

Bazaud Mathieu (AURA-EE)
Bugnazet Clémentine (Le Grand Lyon)
Cogérino Laurent (AURA-EE)
Joannin Eric (Le Grand Lyon)
Laleuf Claude (AITF, Association of Territorial Engineers of France)
Mayoussier Carole (Loire Habitat)
Nayme Pascal (Loire Habitat)
Philibert Benoît (Auvergne-Rhône-Alpes Region)

1 AGENDA

- Round-table introduction of the participants
- Presentation of the CONDEREFF project's context and issues
- Presentation of the regulatory framework (Regional plan for waste prevention and management) of construction waste in the region
- Testimonials of public authorities - how to transcribe the objectives in the contracts?
 - Input about the organisation and relationship between the contracting authorities and project managers on the construction waste management – Claude Laleuf (AITF)
 - Reusing materials on site in the construction sector, example of the Blandan Park in Lyon – Eric Joannin (Le Grand Lyon)
 - Waste approach in terms of a clean worksite, example of a green building site, creation of a quality charter – Carole Mayoussier and Pascal Nayme (Loire Habitat)
 - Example of a road market, reuse of pavement curbs – Clémentine Bugnazet (Le Grand Lyon)
- Exchange time

2 IN SHORT

- The CONDEREFF project is related to another European project on sustainable public procurement, in which AURA-EE is also a partner, the GPP-STREAM project.
- Promoting and raising stakeholders' awareness about resource efficiency represents a continuous and consistent work. In this context, it is expected to involve also architecture schools, programmers, landscapers and engineering offices.
- **The CONDEREFF project includes several improvement actions:**
 - Specify the sustainable development approach in the special technical specifications and provide quantified objectives.
 - Develop offer analysis tools.
 - Accompany the actors in the sourcing phase, promote the development of the sectors by respecting the hierarchy of treatment methods and by linking supply and demand as early as possible in the conception phase.
 - Prepare the building site in terms of waste management, assist companies in the process of observation, diagnosis and characterisation.
 - Attest that the materials are re-usable, guarantee the properties for their new use.
 - Propose a methodology for monitoring the results during the implementation phase and during the lifespan of the asset.
 - Provide training on good practices of waste sorting and monitoring, until its final disposal (exit from waste status), automate waste tracking practices and promote the good practices.
 - Offer educational tools, a training kit on sustainable public procurement and waste management.
- The implementation of these actions will be constantly made under the objectives of the waste regional plan.
