Kick-off meeting and stakeholders meetings.

Kick-off meeting Leeuwarden (NL) great succes

The meeting was a combination of lectures from the EWTW and the start of the iWATERMAP project. During the first day all partners met to discuss the problems of each region. Every problem was assessed and provided with feedback. From this point on all parnters could continue to see how they can

solve this problem. Within the program there were lectures that focused on the problems of the partners. It is now up to all partners to make a roadmap with how they will try to solve the problem. During the next meeting in February, all partners will show the first result. [Read more....](#)

All stakeholders meetings in a row

The stakeholders meetings are done and the project can go to the next step. When you click on this [link](#) you can find all the meetings from the first semester.

Website with information online

The iWATERMAP website is online! The iWATERMAP project focuses on

supporting the innovation policies in water technology sector, helping to increase the critical mass of innovation ecosystems in partner regions in this sector. The critical mass in innovation ecosystem approach means that all the necessary elements for innovation ecosystem are identified and put in place stage by stage, such as academia and business cooperation, cross-cluster fertilization, interregional networks and cooperation, science and education, thus ensuring stable and sustainable development of the system.
