

The Green Screen Ambassador Certification Extra Resources

Green filming constantly evolves: new initiatives and good practices add up to the existing ones which keep improving. If the principles will remain relevant, we hope the examples we give in this toolbox will soon be outdated by new, greener solutions.

This is why you may want to keep updated on the latest innovations and case studies.

Besides the link and references you will find in the inspiration scripts, here are green filming references:

Green Screen:

Besides this toolbox, you can find interesting resources on the Green Screen project's website, including [this comprehensive signpost](#) for all existing European initiatives in sustainable production. <https://www.interregeurope.eu/greenscreen/>

Green Film Shooting:

Run by journalist Birgit Heidiek, Green Film Shooting is a platform for sustainable film & TV production. It was created in close cooperation with the Filmförderung Hamburg Schleswig-Holstein (FFHSH), its strategic partner. Green Film Shooting also shares contents with *Cineuropa* the PGA Green website (below).

<http://greenfilmshooting.net/blog/en/about-us/>

The Producers Guild of America Foundation's Green Production Guide:

Beyond our European borders, PGA Green has developed a large set of tools and information on sustainable production.

<https://www.greenproductionguide.com/>

Agora for Sustainable Filming:

This facebook group is a community of professionals who share knowledge and tips on green filming.
