Thematic Event 1 | November 2019 | Pamplona

---

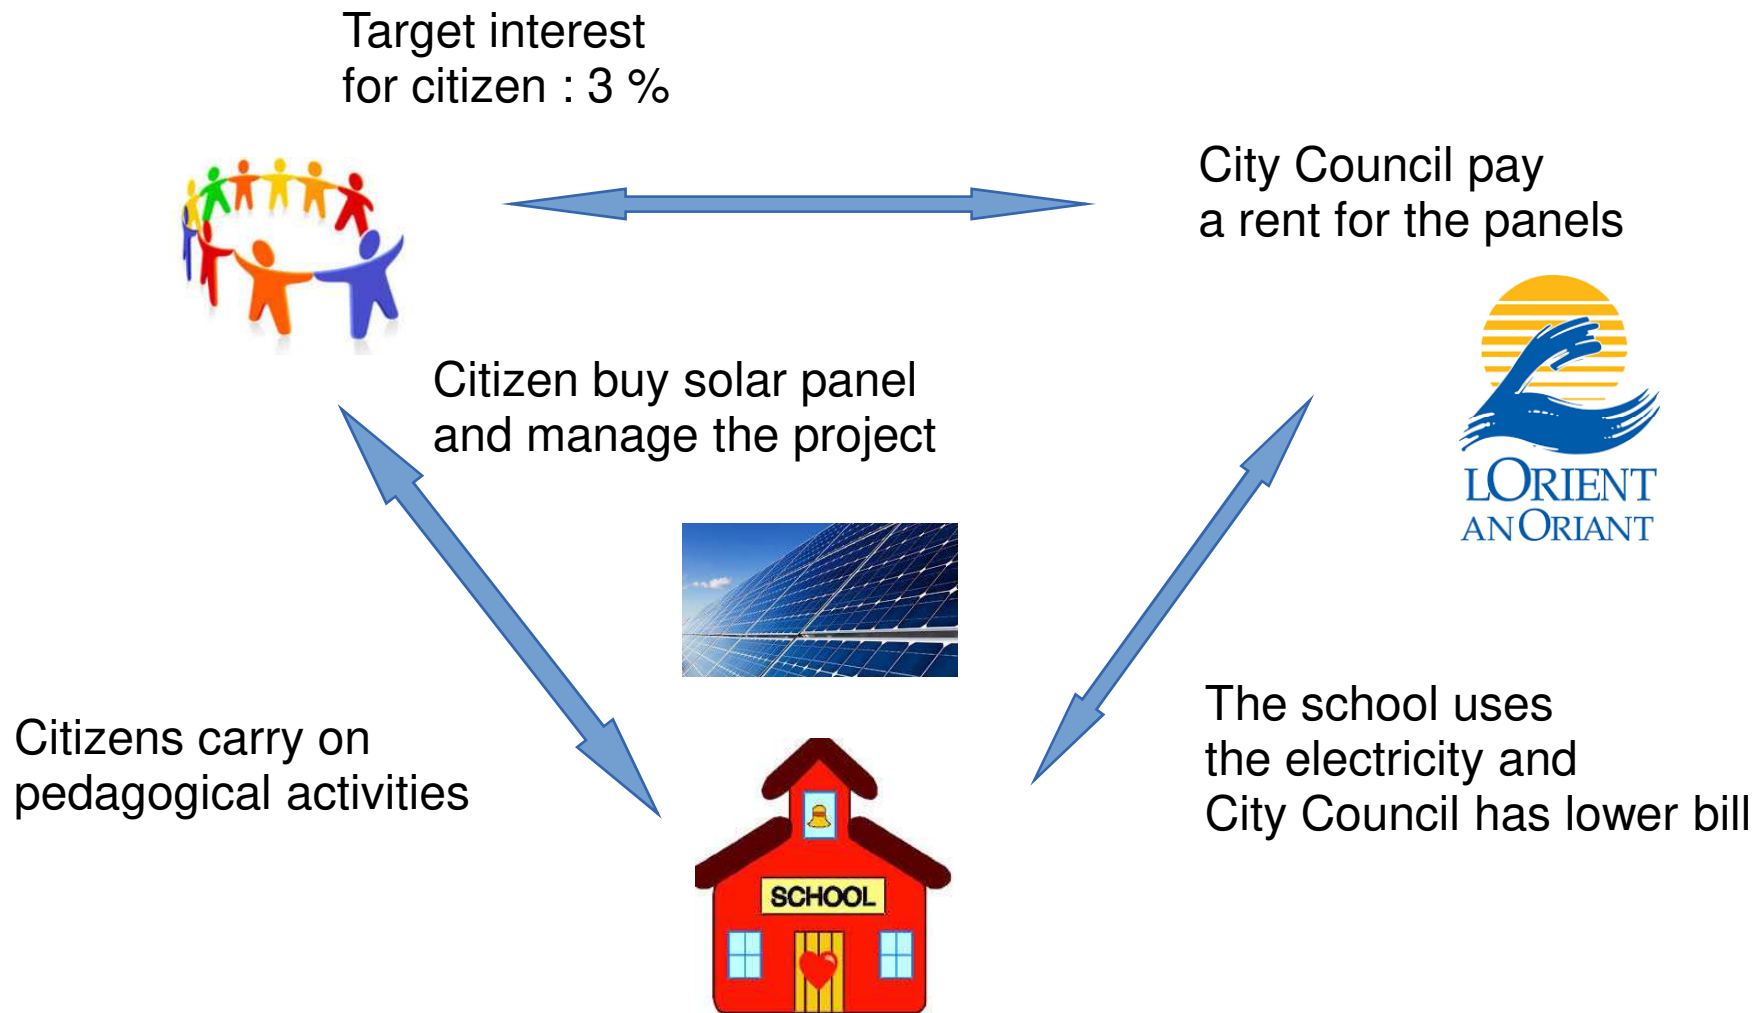

- **Bretagne Énergies Citoyennes (BÉC)**
  - Association funded in 2009
  - People who want to promote together local renewable energy and energy transition
  - We carry on pedagogical activities about energy saving and understanding of how a solar panel works, for schoolboys and girls, and employees of Lorient City Council

- **SAS OnCIMè**

- Company created in 2015 (106 shareholders today)
- Focused on participative management
- Finances local and fully citizen driven renewable energy production projects
- We have built with the City Council the first projects : they wanted to involve citizens in local energy policy, and wanted to reduce the energy bill. We wanted to drive local energy citizen projects.
- Our latest project : we bought the solar power plant, had it set up by a local company, and will rent it for 15 years to the organic food store Biocoop

- **Our economic model : Self consumption**

- **For the future**

- We will merge the society OnCIMè with another local society
- We will make a partnership with Enercoop, which is a cooperative of energy producers
- We are thinking about diversify our production, in wood energy...
