COHES3ION

Interreg Europe

European Union
European Regional
Development Fund

An interregional cooperation project for improving
innovation infrastructure policies

<https://www.interregeurope.eu/cohes3ion/>

COHES3ION will integrate local and regional priorities into regional innovation policies, such as Smart Specialisation, increasing their impact and performance in terms of growth and job creation.

Project Aim

It aims to integrate a regional and sub-regional element (territorial dimension) into partners Smart Specialization Strategies (S3).

The intended outcomes of the project are:

- to increase the overall impact of each partner's S3
- to improve the links between operational programmes in the RD&I environment and public and private sectors
- to promote a policy and governance model

It will work to align innovation policies from a macro to a micro regional level, spreading prosperity across each partner's territories.

Specific Sub Objectives

- To provide methodological tools to undertake a Smart Mapping Exercise of each partners regional innovation governance and policy.
- To identify, exchange and disseminate partner's good practices.
- To provide strategic overview of the Smart Territorial Mapping Exercise with relevant stakeholders leading to the adoption of Regional Action Plans focusing on S3 multi-level governance models and tools.
- To implement and evaluate the impact of Regional Action Plans.
- To action policy recommendations and update innovation and S3 governance models.
