” *Land as capital, heritage, nature,
as investment, inspiration, home.
All finite,
all requiring care.
So, add planning and ecology as wisdom,
for nature’s future, our future.* “

Forman, R.T.T. (2008): Urban Regions: Ecology and Planning Beyond the City.

RENATUR OBJECTIVES

The loss of peri-urban open spaces and the natural heritage within them can be prevented by timely political and planning co-operation beyond administrative borders.

The objective of the RENATUR project is to develop improved policy instruments suitable to protect the natural heritage of peri-urban open spaces. These policies will help to:

PROTECT ecosystems and their services

PREVENT fragmentation of ecosystems and IMPROVE their connection

REDUCE soil sealing

RAISE AWARENESS about the green infrastructure concept in land-use planning

CONSERVE biodiversity and REDUCE loss of biodiversity

RENATUR APPROACH

Phase 1:
Exchange of experience

Phase 2:
Implementation of action plans

RENATUR POLICY INSTRUMENTS

HOW TO ENGAGE IN RENATUR

Who?

Stakeholders from national, regional and local authorities as well as from interest groups and associations, private sector, academia or media are actively engaged in RENATUR.

How?

Opportunities for participation are organized in each region and range from interregional thematic workshops to peer review exercises and public presentations of action plans.
