REPLACE 3rd of December 2019 Circularity Tour

The circularity tour included; the Water Alliance, Wetsus Campus and Van Hall Larenstein University of Applied Sciences (Water Application Centre). Watertechnology is an important enabler for the circular economy transition. The tour included the whole innovation ecosystem on watertechnology. After that, the tour continued at the 'Blokhuispoort' - a former prison redesigned to a creative hub - where the partners were guided through the circular design lab. In addition, professor Marcel Crul provided a presentation on circular plastics. Together with students, he elaborated on projects which are currently important for the circular design lab. Heleentje Swart concluded the day with a presentation about Spark the Movement, highlighting how a in Fryslan, a broad movement works on circular education. This emphasized the silver line of the tour to involve the youth in the transition to a circular economy. Partners and visits during the circularity tour included:
