

Durabilité de la Ressource en Eau Associée aux Milieux

A network diagram with white nodes and lines on a light blue background, forming a complex web of connections.

DREAM DAY 2020

Focus on... the European projects in which DREAM is a partner

Interreg
Europe

European Union | European Regional Development Fund

BIGDATA 4RIVERS

Improving the European Rivers Water Quality through
Smart Water Management Policies

BIGDATA 4RIVERS : learn from each other to make European river basins and water management policies smarter for the implementation of the European Union Water Framework directives implementation,

- 3 years
- 7 partners : Spain, Greece, Romania, Sweden, Portugal, Lithuania, France
- Coordinator : Intermunicipal Community of Alto Minho (Portugal)
- 1 290 645 € total budget including 980 601 euros in grants

Objectives :

- **Improve the efficiency of legislative** measures in preserving and improving the quality of water in rivers and streams
- **Support the implementation of intelligent water management** using Information and Communication Technologies (ICT)
- **Develop regional skills and competences allowing** the project territories not only to improve the performance of their legislative system but also to improve the design and effectiveness of actions resulting from targeted policies and instruments,

Actions :

The project main outputs are:

- **Joint analytical report aiming at** identifying the main rivers' water management policies in the project regions and compare the application level of the water sector European directives allowing partners to identify opportunities & improvement needs of their policy instruments (PI)
- **Exchange of experiences activities** (site visits, knowledge transfer session and interregional workshop)

Means :

- Exchange experiences and good practices between partners
- Adapt these good practises and apply the lessons learned from each partner through the development of individual action plans
- Promote the application of these good practises through the legislative mechanisms of the partners

Improvements expected for the Center-Loire Valley Region:

- Implementation of new innovative projects (via the FEDER RCVL operational program = target device for DREAM)
- Improving governance: better sharing of knowledge and innovative best practices in water management at local and European level

- **6 priority themes:**

- Climate change and environmental risks
- Monitoring of water bodies and environmental assets
- ICT tools for surveillance and monitoring
- Local and regional networks et perception of the private sector/ university
- Water directive
- Water loss

Added value for the DREAM cluster:

- Strengthen its collaboration with Center-Val de Loire Region
- Extend its European network for its members
- Improve the skills on the priority themes of the project (including ICT tools/smart water management)
- Promote projects labeled by the DREAM cluster
- 1st visit of the site: week of 20 January 2020 in Greece
