

Project partners are in the middle of the 2nd project phase

13th Interregional Working Group Meeting

The project partners met in the Ministry of Economy, Science and Digitalisation of Saxony-Anhalt in Magdeburg on 12th of February. The focus of the meeting was the presentation on progress in action plan implementation.

All project partners have developed regional action plans at the end of the first project phase. The action plans provide details on how the lessons learnt from the cooperation will be implemented within the regions. They specified the nature of the actions, their timeframe, the stakeholders involved, the costs and funding source. Furthermore, the projects partners themselves decided how many actions they would like to implement in their regional action plans. The implementation of these actions is monitored in the second project phase, which started in April 2019. Most partners are successful in the implementation of the measures of the regional action plans. Partners discussed the different stages of implementation and ways to facilitate the further implementation up to the end of project phase 2. In addition, project partners discussed opportunities to transfer the presented measures and their implementation to other regions. After the partner meeting and presentation on progress in action plan implementation, project partners will continue the implementation of the regional planned actions.

Upcoming Project Events

Final Project Conference in Maastricht +++ Save the Date +++

The project's final interregional working group meeting and the second dissemination conference will take place in Maastricht on 17th and 18th of June. The aim of this final conference is to present final results of the project implementation in phase 2 and to introduce the implementation of regional action plans to broader audience. Stakeholders from the chemical industry are cordially invited to join the event. News about the venue and the agenda will be announced shortly on the project website.
