About MOMAr

Models of Management for Singular Rural Heritage (MOMAr) is an Interreg Europe 4th call programme funded by European Union. MOMAr means providing strategic thinking to the use of cultural and natural resources. The project highlights the existence of territories with problems - depopulation, ageing, no use of resources- whose identity is however marked by a rich heritage, exceptional in some cases - UNESCO heritage - and whose management entities have either not finished defining their models of action in terms of cultural and natural resources or directly borrowed models that do not correspond to the territorial reality.
