

SHIFTING TOWARDS RENEWABLE ENERGY FOR TRANSITION TO LOW CARBON ENERGY

European Union
European Regional
Development Fund

€1,844,165.00

from 1 Aug 2019
to 31 Jul 2023

Project objectives:

- improving regional and national policies;
- increasing the share of energy from renewable sources;
- encouraging and facilitating the production and use of renewables by businesses, communities and households;
- contributing to less carbon intensive energy future.

WHAT WILL THIS PROJECT CHANGE?

The SHREC project will tackle issues how to influence the renewable energy production and consumption by business, communities and households. Partners seek to raise the awareness of renewable energy among households, business and public actors and increase opportunities to use renewable energy as the low-carbon alternative energy.

HOW CAN YOU PARTICIPATE?

- Join stakeholder meetings in your region;
- Participate in the project thematic events;
- Follow SHREC news on website and social media;
- Spread the awareness of the importance and benefits of renewable energy by sharing the SHREC news.

**GREEN SOLUTIONS FOR EVERYONE,
TO USE AND PRODUCE!**

The SHREC project addresses the challenge of transition to a low carbon economy, in relation with renewable energy use of business and households facilitating them to invest in low-carbon, renewable energy measures reducing CO₂ producing activities and shifting to activities with low CO₂ footprint.

FUTURE PLANS AND CHALLENGES

SHREC team is undertaking the following activities and challenges:

- encouraging business investments into renewable energy and new innovative technologies;
- increasing involvement of energy consumers as active players.
- encouraging technological development in renewable energy (support for business, industry to develop new technologies);
- exploring the social innovation concept for consumer involvement (households, communities, industry, business representatives, public authorities).
