Partner meeting in Athens, Greece

Two-day meeting of European partners and project teams of BIGDATA 4RIVERS held on 22 & 23 January 2020 in Athens.

The meeting was organized by the Regional Development Fund of Attica.

The first day included visits and guided tours to places of interest in Attica Region (Schinias National Park, Marathon Lake, Asopos River) where stakeholders had the opportunity to see specific case studies on big data management of water, as well as problems caused by pollution.

On the second day, the meetings of the Project Coordination and Technical Committee were held in the area of Technopolis in Athens, where important innovations and initiatives were discussed by all project partners.

1st NURE Local Stakeholder Group meeting

On October 29th 2019, the first meeting of the NURE Local Stakeholder Group was held with the main objective of presenting the project and establishing the group work.

The main conclusions were and the group's starting point were the following:

- The need for an integrated system for real-time management of water quality
- The need to modify and, as appropriate, develop new laws that complete the management of water quality and reduce the impact of small polluters on water quality.
- The need to rethink the way of managing the purification stations because the territorial units do not have funds or specialized human resources.
