Number of good practices identified

This indicator measures the number of good practices identified during the exchange of experience process. Only practices that have been carefully analyzed and validated as being valuable within the project should be considered under this indicator. This means that projects should be reasonable when estimating the target value for this indicator. The idea is to report under this indicator the most valuable experience only and not all practices identified throughout phase1. Since a project builds on the experience of the participating regions, the good practices identified should also primarily be located in the partnership area. The number reported under this indicator should correspond to the number of good practices validated by the joint secretariat and available on the project website through the online good practice tool.

A good practice is defined as an initiative (e.g. project, project, process, technique) undertaken in one of the programme’s priority axes which has proved to be successful in a region and which is of **potential interest to other regions. Proved successful is where the good practice has already provided tangible and measurable results in achieving a specific objective.** Although the Interreg Europe programme primarily refers to good practices, valuable learning also derives from bad practices where lessons learnt can be taken into consideration in the exchange of experience process.

Interregional cooperation projects need to analyse the experiences and/or practices exchanged **within the projects** and disseminate the most interesting findings. In particular, this is achieved by providing input into the programme’s **online good practice database** which allows publishing the good practices identified on the project’s website. Only the good practices reported through this database and validated by the joint secretariat should be counted under the indicator ‘number of good practices identified (see also section 4.3.2). The nature of the practices can be very different depending on the project (e.g. governance approaches, methodologies, projects, techniques, etc.).

ARE THE RESULTS/LESSONS LEARNED CLEAR?

WOULD YOU LIKE TO HAVE MORE INFORMATION?

IS THE PRACTICE RELEVANT FOR YOUR POLICY INSTRUMENT?

IS THE PRACTICE RELEVANT FOR YOUR ORGANIZATION?

DO YOU THINK YOUR PEERS/STAKEHOLDERS COULD BE INTERESTED IN THIS GOOD PRACTICE?

SCORE: 1 to 5

- **Effective and successful:**

A “good practice” has proven its strategic relevance as the most effective way in achieving a specific objective; it has been successfully adopted and has had a positive impact on volunteers training and its outcomes.

- **Goal-orientated:**

A “good practice” meets current needs, in particular the essential needs of strengthen soft skills.

- **Technically feasible:**

Technical feasibility is the basis of a “good practice”. It is easy to learn and to implement. .

- **Replicable and adaptable:**

A “good practice” should have the potential for replication and should therefore be adaptable to similar objectives in varying situations.
