2Lifes survey

Recycling of construction materials

Option 1: Focus on recycling (construction) materials from the recycling stations.

Company name and department:		Date:
	Name:	Counterinformations:
		Completed by:

NO.	Question	Answertype	Answer
1	Do you have an idea of how much construction waste your company produces monthly?	Yes/No	
2	By your assessment, what type of waste makes out the largest portion of your waste volumes?	Text	
3	Do you see any economic value in construction waste?	Yes/No	
4	How is the waste transported to disposal?	Text	
5	Do you usually take of this transport yourself?	Yes/No	
6	Who collects the material on the building-site? You or others?	Text	
7	Is it easy for you to dispose the waste at the recycling station or elsewhere?	1 to 5 (1=very easy, 5 too difficult)	
8	Have you done anything to reduce the amount of waste?	Yes/No/Don't know	
9	To what extent are the waste quantities sorted at the construction site?	1 to 5 (1=nothing, 5=everything)	
10	Would it be possible to divide the waste more than you do now?	Yes/No	

11	What is the biggest barrier to make it better?	Text	
12	Would it be helpful if others carried out the clean-up and sorting at the construction site?	Yes/No If yes, when?	
13	Would you be willing to pay for clean-up and sorting?	Yes/No	
14	Would you be interested in using / building with surplus material if it was made more accessible?	1 to 5 (1=no, 5= yes)	
15	Which barriers do you see in using used or surplus constructions materials?	Text	
16	How often does the developer demand waste minimization?	1 to 5 (1= never, 5=everytime)	
17	Do you occasionally use surplus materials?	Yes/No	
18	Would it be positive for you if others could use your surplus materials?	Yes/No	
19	Other remarks	Text	

Thank you very much for your answers.
 Have a nice day !
