

TRANSNATIONAL LEARNING JOURNEYS

TLJ 1: LITHUANIA

The workshop “From theory to practice”, tackled the implementation of LC (Life Cycle) methodologies in environmental and resource efficiency policies, focusing on practical means to apply LC into practice. In a second part partners compared and discussed the 7 regional analysis.

January 2020

TLJ 2: NAVARRA

With a virtual touch, this TLJ explored the life cycle concept and its relation to resource-efficiency. It included an overview of Navarre’s policy context, a discussion on the regional analysis benchmark, an introduction to the use of carbon metrics to reduce carbon impacts, a presentation of 7 LCA good practices on resource efficiency, and 2 virtual study-visits.

June 2020

TLJ 3: SATAKUNTA

This TLJ focused on the exchange of experience on LCA for waste management and material flows, delving into the question from different angles thanks to three sessions: LCA for sustainable regional development; LCA good practices on waste management and material flows; case studies from Finland focused on waste management and nutrient recycling and peer review.

October 2020

TLJ4: SLOVENIA

This TLJ focused on use of life cycle tools and methods in public procurement. It included three sessions: LCA in public procurement – the experience of Slovenia and the French Green “Clause” initiative, partners’ good practices of LCA in public procurement, the Finnish experience and its center for sustainable and innovative procurement, case studies and peer review.
