Delights of Crete (DoC)

Delights of Crete (DoC) cluster aims at promoting the Cretan diet and its products while encouraging the respect for the environment and the cultural heritage.

Delights of Crete Project aims at substituting imported raw materials with locally produced by-products, through the collaboration of 4 local companies participating in the cluster, active in the production of flour, olive oil, fruit juices and dairy. In addition to that, DoC also points at the production of olive biomass to respond to the demand for cheap and sustainable domestic energy, and it can be used for domestic and industrial consumptions. For this project, minimum financial resources are needed, due to the existing infrastructures among cluster's members.

Olive crop is cultivated in numerous areas across Europe, and so the project it is easy to export in other regions, specially in the South of Europe.
