

Welcome session

Greetings from lead partner

INTENCIVE project partners have worked together for three years and recently one of the main outputs of the project was accomplished as five action plans have been published. Action plans describe the lessons learnt from the project and the actions which each region is aiming for to improve their policy instruments. Now the project will move to the one-year follow-up phase when partners monitor implementation of the actions and track the territorial impacts it has in the region. In this newsletter we present all five action plans and plenty of interesting news from the regions. Partners from the INTENCIVE project wish everyone a very nice summertime!

Enjoy reading!

Sanna Inkeri
Project Manager
Regional Council of South Ostrobothnia

ACTION PLANS

- Action Plan of South-Ostrobothnia region**
Region of South Ostrobothnia in Finland has created an action plan with three actions for developing wellbeing technology in the area.
