

Learning Report about the 5th Interregional Partners Meeting of the SinCE-AFC project on line ZOOM, 3-4 November 2021

According to the Application Form: “After the completion of the learning event, the LP will ask the PPs to complete a learning Report on the gained experience and a table with the overall knowledge gained during the 5 semesters with special reference to the good practices of the other partners that could have an impact on their regional policies.”

Please think of our recent on-line meeting hosted by PP6. Please let us know shortly (no long texts needed) about what did you learn or what did you find interesting for your home region. If your stakeholders would like to express an opinion, then please combine their answers with yours.

Please be honest, we appreciate all comments and will use them also for reporting purposes.

A) What did you find most interesting from the international event with stakeholders and what can you take home from it?

It was interesting to see that some partners have the same „issue” in their region, according to the Action Plans presented, not only for our occasion, in Hungary but also in Poland and Italy, the main task is raising awareness for SMEs concerning circular economy.

B) Which aspects did you learn for your region and your policy instrument from the:

1. Presentations and discussions of the Session related to the presentations of Action Plans and Study Visits?

It was interesting to see that some partner have the same „issue” in their region, according to the Action Plans presented by other partners (Poland, Italy) the main task is raising awareness for SMEs concerning circular economy.

2. Presentations and discussions of the Session related to the Donegal Country Region Policies

It was great to hear about the national actions toward circular economy and its regional actions/concerns.

3. others?

C) Please provide us feedback on the project meeting and what we could improve for any other forthcoming meeting(s):

1. organisation of the meeting (e.g. timing, breaks, duration)

It was a great organisation, I really liked the combination of presentation and site visits.

We had a clearly well organized and structured meeting. The process took place without significant delays. Everything was properly prepared, discussed and communicated.

2. content (e.g. too basic/advanced, or too specific, too programme-driven)

The content of the event provided us a valuable input not only concerning our action plan but also content to share with even our wider stakeholder group.

3. methodology (e.g. balance of study visit, presentations vs. chances for contributing by yourselves)

Not applicable

4. information provided before the meeting

I received enough information in time. Thank you!

5. others

D) Other things you would like to comment on (positive or negative)?

E) Please share with the partners your aspect upon the overall learning experience gained, giving special prominence to the good practices that intrigued you foremost?

We plan to have the import workshop in the first week of December. We asked the Italian partners to present 3 good practices: Circular economy platform, Future food institute and Agrofood BIC. The exact date is under negotiation with the Italian partners. We will send out the invitation to all partners maybe it could be interesting for some.
