

STAKEHOLDER ENGAGEMENT REPORT

Frysylân, 08.02.2022

Stakeholder event, semester 6, Working on Cross-Regional Synergies: Exploring the Circular Plastics

During the fifth and sixth semester, CCDRC, HWWI, Frslân and Advisory Partner Veltha worked on the exploration of cross-regional synergies in the Plastics sector, with the aim of highlighting interregional opportunities for cooperation among local stakeholders in promoting the transition toward a circular economy in plastics.

Following the methodology developed by REPLACE project, the exploration of cross-regional synergies in key sectors within the partnership is structured through the organization of several meetings, with a significant contribution of stakeholders coming from the different regions and active in the sector, with the aim of discussing potentials and capabilities for circular economy in the plastics field.

The online stakeholder meeting took place on February 8th, with 8 participants representing the plastics sector.

The meeting served to prepare the follow-up event with the participation of interregional actors. The main objective was the identification of the characteristics and the needs of the plastics stakeholders in Fryslân, to highlight possible areas of cooperation with stakeholders in Centro region and in Hamburg.
