

# DOSSIER

## 4<sup>th</sup> INTERREGIONAL EVENT

### FINERPOL 5<sup>TH</sup> CALL

#### EXTREMADURA, Spain

13 – 14 September 2022

## INTRODUCTION

---

The 4th Interregional Event of the 5th Call FINERPOL Project was held in Extremadura on the 13-14th of September 2023 organised by Extremadura Energy Agency (AGENEX).

Partners and stakeholders from UK, Greece and Check Republic visit the region to discuss how the COVID19 crisis has impacted on the energy renovation of buildings and financial instruments and other tools available to boost the process.

During the first day, partners spent the first day in Caceres, visiting the EDEA Project and the second day in Badajoz, at the Final Dissemination Event of FINERPOL and CISMOB project where the regional stakeholders could learn about the projects' results and visitors could understand Extremadura regional context.

# AGENDA

Day 1: only FINERPOL partners

13 Sept 2022	Technical Visits
09:00 – 10:15	Transport to visits location (Cáceres) from meeting point (TBD)
10:15 – 13:30	Technical Visit – Center for innovation and quality of buildings ( <a href="#">EDEA-CICE</a> ) Presentation of Extremadura Good Practices Steering Committee Meeting
14:00 – 15:30	Networking lunch ( <i>restaurant to be determined</i> )
15:30 – 16:30	Cáceres City Centre Walk
16:30 – 17:30	Transport to Badajoz
20:00	Project Dinner

Day 2:

14 Sept 2022	<b>CISMOB + FINERPOL Open Dissemination Event</b> <b>Thematic conference and Building Capacity Workshop:</b> <b>Energy Efficiency and TICs for Citizens applied to Transport and Housing</b>
--------------	--

**AGENDA ATTACHED**

14:00 – 15:30	Networking cocktail	
15:30 – 17:00	Workshop for project partners and stakeholders	
	<b>Sustainable Transport Workshop</b> Project partners and stakeholders from CISMOB	<b>Financing Energy Rehabilitation Workshop</b> Project partners and stakeholders from FINERPOL
Coffee station available during the workshop		

### 13th EDEA Project visit CÁCERES

EDEA CICE, Centre for Innovation and Quality in Building, aims at applied research, experimental demonstration, training, development and promotion of renewable energies and energy efficiency in architecture.

EDEA-CICE includes a set of spaces, buildings and facilities for the study and full-scale experimentation of equipment, products, materials and construction systems proposed by future collaborators, be they companies, universities, institutions or manufacturers.

EDEA-CICE promotes the construction and renovation of buildings with sustainability and energy efficiency criteria, improving the productivity and competitiveness of SMEs and professionals in the sector, as well as the participation of Extremadura in European projects that require cooperation with other European regions.

INTROMAC presented the EDEA project and show the demonstration buildings to the project partners. Partners could learnt about the innovative passive and active energy efficiency measures tested on the demonstration buildings, the benefits, results, etc. Additionally, INTROMAC presented other initiatives related to EE in buildings that are being developed by them and Extremadura RG, such as the BIMEX project, ReNatural NZEB project , etc.

**14th September – Final Dissemination event FINERPOL-CISMOB**

**EXTREMADURA ENERGY TRANSITION:  
TRANSPORT AND BUILDINGS**

14th September 2022  
Hospital Centro Vivo (Badajoz)

Organize by:

With the collaboration of:

**EXTREMADURA ENERGY TRANSITION:  
TRANSPORT AND BUILDINGS**

- 09:00 Arrival of participants
- 09:30 Event opening  
*\*Representative of Badajoz County Council*
- 09:45 Think global. Act local. Financing energy efficiency and sustainable transport in Extremadura  
*Cosme Segador Vegas. Director of Consortium Extremadura Energy Agency*

**TRANSPORT**

- 10:00 CISMOB project: ICTs for sustainable mobility  
*Jorge Bandeira. University of Aveiro (Portugal)*
- 10:15 Transport on Demand in Extremadura (TADEX)  
*Eva María Sánchez-Montero Velasco. DG Transport – Extremadura RG*
- 10:30 Badajoz County Council Electric Mobility Plan (Plan MOVEM)  
*Martín Cobos Rodríguez. County Council of Badajoz (Rural Development and Sustainability Area)*
- 10:45 "Badajoz takes care" project  
*Fernando Blázquez Vera. TUBASA – Badajoz City Transport Company*
- 11:00 Green mobility for Bucharest-Ifov Region  
*Alina Ciolan. Bucharest – Ifov Intercommunity Development Association for Public Transport*
- 11:15 Stakeholder from Portugal (UA)

11:30 BREAK. NETWORKING COFFEE

**BUILDINGS**

- 12:00 FINERPOL Project: Financial Instruments for the energy renovation of buildings  
*Ana Martínez Pinilla. Consortium Extremadura Energy Agency.*
- 12:15 Grants for sustainable mobility and renewables energies (MOVES y Autoconsumo)  
*Samuel Ruiz Fernández. DG Industry, Energy and Mines – Extremadura RG*
- 12:30 Grants for energy building rehabilitation  
*Alfonso Gómez Gofí. DG Architecture and Building Quality – Extremadura RG*
- 12:45 Financing energy building rehabilitation: Extremadura Guarantee Fund  
*Juan Ignacio Mateos Rollán. Extremadura Avante*
- 13:00 FINERPOL partners' presentations  
*Prague's Renewable Energy Community - Jaroslav Klusák + others\**
- 13:45 Event Closure  
*Olga García García. Regional Ministry for the Ecological Transition and Sustainability – Extremadura RG*

14:00 NETWORKING COCKTAIL

14th September 2022  
Hospital Centro Vivo (Badajoz)

Organize by:

With the collaboration of:

*\* To be confirmed*

The Conference 'Energy Transition in Extremadura: Transport and Building', organized by the Extremadura Energy Agency Consortium (AGENEX), highlighted the urgent need to act in the building sector and in sustainable mobility, to move towards a safe energy transition.

As explained by the director of Agenex, Cosme Segador, at least 60% of the 400,000 registered buildings in Extremadura (more than 660,000 homes) were built before 1980; that is, prior to the regulation that obliges to insulate the facades.

Segador recalled that the Junta de Extremadura is encouraging these measures, especially self-consumption facilities in SMEs and individuals, whose processing has been simplified to facilitate the deployment of these infrastructures in the region. In addition, the Executive has a budget item of 13.9 million euros, and six aid programs aimed at both large companies and SMEs, NGOs, individuals and other public administrations.

Junta de Extremadura is encouraging these savings and efficiency measures. Grant programmes are currently open for energy rehabilitation in homes, and self-consumption facilities for SMEs and homeowners, as well as grants for the acquisition of electric vehicles and the installation of charging points that are part of the Regional Strategy for the Promotion of electric vehicle with horizon in 2030.

The conference was closed by the General Director of Industry, Energy and Mines, Samuel Ruiz, who stressed that "the transition towards a clean energy model is more urgent today than ever, a renewable model that helps us combat climate change, which contributes to promoting the sustainable growth of our economy and developing energy self-sufficiency".

He also explained that "accelerating investment in clean and efficient technologies can be the core of the solution for the decarbonization of the economy, to contribute to energy independence and to offer price stability in the complicated energy scenario we are experiencing, in addition to contributing to the care of the environment".

The general director concluded by ensuring that "economic sustainability is directly linked to the sustainability of the energy system" and for this reason, Extremadura is already working on the energy transformation towards a more inclusive and safe energy system that provides solutions while creating value for our companies and Extremadura society as a whole.

Likewise, during the day it was possible to learn about other experiences that are being developed in Europe, such as the Green Mobility in Bucharest, and the Sustainable Mobility project in Portugal.

Additionally, the experiences of the partners of the FINERPOL project, Renewable Energy Community of Prague, and Promoting the role of SMEs in the rehabilitation process, of Plymouth, have been exposed.

## 14th September – Financing Energy Renovation Workshop

After the final Conference, during the afternoon, FINERPOL Partners and stakeholders could participate in a workshop to share the learnings gathered during the 5th call of FINERPOL project, Good Practices analysed that could potentially be transferred to their region, problematic found after the COVID19 crisis, opportunities identified and potential policy improvement after the exchange of experiences.
