

- Do you have conversations (such as meetings, online meetings, phone call) with your stakeholders / Implementation partner or about the implementation of the new policy discussed in the action plan?
- Is the policy owner / Implementation partner experiencing any issues implementing the new policy outlined in the action plan?
- Has the project been successful in influencing this policy? If it has, then more action is needed. This will be addressed on the iOLF.

In case of a new policy instrument:

- Does the new policy instrument resemble the one described in the action plan?
- Is your call for funding (new policy) similar to what you have outlined in the action plan?
- What was planned in the action plan and what was implemented by the policy owner differ? If yes, describe the differences and the consequences.
- Does the owner of the policy adhere to the timeline for implementation outlined in your action plan?
- Have the indicated indicators changed in the action plan? If yes, how and why? Numbers, quantity, quality etc.
- Do the regional stakeholders have a role in the implementation of the policy or action plan? If yes, what kind of role?
