

Greetings from the REDUCES project!

The REDUCES project is experiencing busy times. During the spring, good practices have been collected on product-life extension, renewability and product as a service model. The first Good Practice study report on product-life extension cases will be published in July.

Also, each partner has investigated the state of the circular economy in their regions. The results are compiled into Status Quo reports that will be published in late summer.

Even though the summer is just ahead, it is time to take a closer look for the autumn season as well. During the fall, the collection of best practices will continue. The third international meeting will be held in September in Utrecht, the Netherlands. The corona situation also poses challenges for the REDUCES project meetings, but in September there will be a meeting, either live or online.

The REDUCES project team wishes you a sunny summer!

Sustainable development was reflected in

Valencia

The 2nd interregional meeting took place in Valencia, Spain, in March. The objective of the meeting was to reflect on sustainable development through the use of circular economy models, since the exchange of experiences and knowledge within and between regions is key to the development of action plans that support environmentally sustainable business models within each region.

What's up, REDUCES?

Back in time and forward to nowadays

Paul shares his memories and thoughts when he first got to know the REDUCES project and its themes at the beginning of August 2019.
