

## Greetings from the REDUCES project!

### Good practices for circular economy business models

We have gathered together good practices for circular economy business models from different parts of Europe. Good practices are inspiring solutions that are evaluated in our project and can be recommended as a model. Are there any models you could adapt to your own business?

**READ MORE ABOUT THE GOOD PRACTICES**

## Study report on sharing platforms

The study report 3 focuses on sharing platforms. Sharing platforms promote collaboration among users to increase the usage and value derived from products. The report presents different examples of sharing platforms evaluated in our project.
