

## AgroRES Final Newsletter

The AgroRES project is approaching its final after four years of interregional learning, exchange of good practices and creation and implementation of action plans. Read this newsletter to learn the outcomes in the seven partner regions!

### AgroRES results in a nutshell

*28 June 2023*

The four-year AgroRES project ending in July 2023 has brought about tangible measures that encourage the production and use of renewable energy in the agricultural and rural sector. Help desks or support services have been established, new innovative technologies found and implemented, and regulations and strategies developed.

## Help desk for rural bio-districts in Lazio, Italy

21 June 2023

Thanks to the exchange of good practices and the experiences acquired in the AgroRES project, we discovered a lack of development of energy communities in Lazio region. In the second and final phase of the AgroRES project, we composed an action plan that proposes implementation of a help desk service to support rural communities

## Ireland: Technology guidance for farm businesses

19 May 2023

The sharing and research of good practices and technical site visits throughout the AgroRES project have demonstrated the availability and replicability of renewable energy solutions for the Agri-sector in the Northern and Western Region in Ireland.

## Extremadura: Support services for energy communities

22 May 2023

Thanks to the examples of good practices and to the findings of the regional self-assessment process, AGENEX detected that the implementation of renewable energy communities was highly feasible in a rural and unpopulated area, in which the joint collaboration between the public sector and the citizens could create synergies that will facilitate a significant reduction of fossil fuels used in rural areas.

## BIRDA: Building up know-how and visibility of RES

8 June 2023

At the beginning of the AgroRES implementation in the Bucharest Ilfov region the topic of production and use of renewable energies in the agricultural sector was almost nonexistent on the public agenda. Exchange of experiences and events organized in the AgroRES project brought inspiration from other regions that faced same challenges and benefitted from the knowledge that was generated through the project.

## Devon County Council – Community-owned renewable energy

21 Jun 2023

Devon County Council (DCC) has supported community energy projects since 2011 and the county now has one of the most thriving community energy sectors anywhere in the UK. Through the AgroRES project, DCC learnt about how the agricultural sector can work with the community energy sector to increase the use of renewable energy to meet net-zero goals.

## Energy Policy of Lubelskie aims at carbon neutrality

13 Jun 2023

As part of the implementation of the regional AgroRES Action Plan, the Lubelskie Voivodeship updated the *Development Strategy of the Lubelskie Voivodeship until 2030*. The document emphasizes a wider dissemination of energy production technologies from renewable sources and their use, especially in rural areas.

## North Karelia: Keeping an eye on carbon balance

23 May 2023

Inspired by interregional exchange of ideas in the AgroRES project, a study on renewable energy in agriculture was made in North Karelia, and finalized in January 2021, including information on carbon balance in agriculture in the region. As a result, the renewed Climate and Energy Programme now includes control of carbon balance.
