[LEARN MORE](#)

CLUSTERIX 2.0 is a project financed under the Interreg Europe programme that addresses the improvement of regional innovation policies by making better use of clusters. Over decades clusters have proven to be efficient policy instruments enabling cooperation between industry, research and policy, but CLUSTERIX 2.0 looks forward into new ways of facilitating intra and inter regional cooperation. This shall be done by focusing on the identification and structured use of complementary industrial and research competences and by introducing new models of innovation through the implementation of strategic cluster partnerships.
